Chloe Pyrah

Technology, Data & Digital Transformation Leader Resume

Senior business leader with 9 years of experience translating complex data and intelligence strategy into compelling executive narratives to influence C-suite and board-level decision-making. Led multiple high-performing teams in data architecture, technology transformation, measurement and account management. As Board Director for one of the UK's fastest growing digital agencies, defined and led data and intelligence strategy for 50+ clients in various verticals and regions.

EXPERIENCE

2023 - 2026 | Senior Director of Data & Intelligence and Board Director
Open Partners, United Kingdom

Set **commercial strategy** with company founders and board to define and deliver a 3-year strategic plan, taking joint ownership of P&L targets and commercial priorities. Drove $6M in revenue growth, 80% client retention and a 4 percentage point improvement in profitability through new business development, commercial scoping of data and AI products, and expansion of existing accounts, directly positioning the business for a future M&A transaction. Led end-to-end technology procurement across 10+ vendor selection cycles (ClickUp, Slack, ThoughtSpot, Power BI), from requirements and RFP to negotiation and onboarding, managing budgets of up to $5M a year.

Acted as the most senior **digital measurement** consultant across 50+ international client accounts, designing and leading programmes at local, regional and global levels using MMM, econometrics and multi-touch attribution. Validated and maximised $130m+ of media, creative and technology investment across 100+ campaigns, translating complex findings into commercial recommendations that proved media effectiveness and drove revenue growth. Applied these measurement practices across various verticals including hospitality, ecommerce, travel and automotive.

Led business-wide **AI transformation**, unifying disparate capabilities into a standardised operating framework and onboarding multiple AI tools including ThoughtSpot, ClickUp AI, Kaizan and proprietary platform “Alvu” to 200 end users across upskilling and governance. Increased AI utilisation from 15% to 90% within 12 months, evolved the agency's data architecture for AI readiness, saved $100k+ in technology fees and deployed more sophisticated LLMs across 3 company-wide BI and GenAI tools, solidifying long-term AI foundations across the business.

Pioneered the agency's data and technology **product portfolio**, leading product strategy, client delivery, roadmap, commercials and mentoring 12 product leads. Owned the development and implementation of 6 integrated data products generating $5.4M in revenue across 50+ clients in the last 3 years. Collaborated with Google and Meta at senior advisory board level on industry-leading measurement and AI initiatives while maintaining senior relationships across a wider ecosystem of third-party technology and media partners.

Cultivated a culture of cross-functional **collaboration and agile working** across 7 business divisions, establishing standardised frameworks and transparent communication rhythms that aligned 150+ employees around shared goals. Led the operationalisation of complex strategic workstreams and implementation of communication platforms across the business, delivering every project on time and within budget.

EXPERIENCE CONTINUED

2020 - 2023 | Head of Data & Intelligence
Open Partners, UK

Designed and delivered full-stack architecture of multiple client-facing SaaS tools incorporating SQL/Python transformation, 30+ API sources, machine learning and front-end BI tooling (Looker Studio/ThoughtSpot) to serve 50+ clients and hundreds of individual users.

Led a team of 12 in designing and implementing marketing measurement strategies across 50+ clients to improve data maturity through MMM, econometrics, multi-touch attribution, data engineering and analytics.

Established scalable reporting frameworks, data literacy and transformation projects across 7 teams to standardise commercial decision-making across the business.

2018 - 2020 | Performance Analyst
Open Partners, UK

Activated and optimised complex media campaigns across programmatic, social and search channels for 10+ clients, developing agency-wide measurement frameworks to drive optimisation decisions.

Created and led the agency's SaaS data visualisation product from back-end engineering to front-end UI, applying machine learning techniques to automate campaign performance analysis.

2017 - 2018 | Programmatic Trading Analyst
Dentsu Aegis Network, UK

Created a global audience insight tool of proprietary technology in collaboration with Amnet global team.

Designed and implemented optimised workflows to improve programmatic campaign effectiveness across the client portfolio.
